Northwind "In the Field Grouse Habitat Maps"
 Lake Superior State Forest 2011

Please Note: Many state properties are land locked by private property. Please respect others private property and do not trespass in order to hunt a state property that may be surrounded by private property. Please ask permission. I have tried to show different access areas to various state lands. However that does not mean that those trails are open for public use. Permission may be needed in order to access these state parcels.
